Designed, wrote all content for, and teach the various [Global Financial Markets](#) (GFM) courses, which roughly 60% of Darden students elect to take. As a First Year Elective, GFM (offered every spring since 2006) provides MBA students with macro-finance training just prior to their summer internships. For those who cannot take GFM in the First Year, the course runs again in the Second Year. Advanced GFM, an MBA course offered 2013-2015, is an intensive student-led capstone course on some of the biggest issues in international finance.

Co-designed and co-led, with Veronica Caddac Warnock, the MBA course Transforming Societies and the Spring 2013 'field experience' course, [Global Sustainability in Practice](#) (Objective: A sociological and anthropological study of one village in rural Mindoro, Philippines).

Co-designed and co-led, with Saras Sarasvathy and Veronica Caddac Warnock, the MBA 'group incubator' course, Markets in Human Hope, in which students seek to build innovations that use business and markets as viable tools in promoting human development and transforming societies by creating products, services, business methods, organizational forms, financial instruments or market-based mechanisms that address pressing issues in economic development and social well-being. Examples of recent projects: cell phone banking in Haiti and underserved areas of the US; peer-to-peer lending focused on consolidating and refinancing consumer and small business debt; an entrepreneurial approach to providing housing to low income households in West Virginia; a microfinance fund; fostering entrepreneurship in Tibet; and work on the housing finance sector in Nigeria.
